SELECTED GRA ACCOMPLISHMENTS DURING 1962

25X1X4

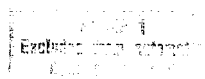

2. With developing crises in free world areas, prepared a number of Geographic Intelligence Memoranda to provide top-level users with a concise statement of pertinent geographic factors influencing or impinging upon foreign political and military matters affecting the security interests of the United States. Attention included air and ground access to Berlin, the Sino-Indian border war, and the prospects for the federation of Malaysia.

3. Of unique timeliness was a geographical survey of some 380 Cuba caves produced just prior to the crisis in October. The survey has served as a working tool for numerous offices concerned with analyzing the potential utility of caves for missile storage as well as for other significant military uses.

5. Two hundred medium-scale maps of the USSR, presenting a current and accurate topographic picture of priority areas, have been produced in conjunction with the Army Map Service. The maps record and highlight all priority intelligence targets. When completed, in some 1700 sheets, the series will provide for the first time full coverage of the USSR.
